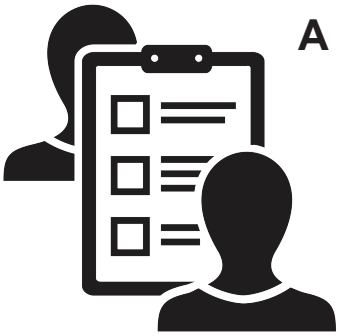
EVALUATION TOOL BASKET

Resilience Research Centre
www.resilienceresearch.org



A step toward improving and growing your program

The RRC has developed a Tool Basket that will help you complete an internal evaluation of your program or organization. Whether you are overwhelmed at the thought of an evaluation or excited by the opportunity for improvement, this tool basket will help you complete an evaluation that requires little of your time and resources.

For organizations with little or no funding

You do not need to have any experience with evaluations. Each tool is easy to use, with step-by-step instructions and you don't need to spend much time doing them.

Plan and guide your evaluation

The Tool Basket holds several tools that can be used to plan and design your evaluation, measure change and the effectiveness of your program.

The tools included will help you to measure:

- **Risk**
- **Resilience**
- **Service Satisfaction**
- **Community value of the program**

The Evaluation Tool Basket is FREE to use

Please contact us for access: rrc@dal.ca

The RRC team is also available for consultation.We look forward to helping you complete this process!
